

## MEMORANDUM

September 13, 2022  
Regular Board Meeting

---

**TO** Board of Trustees

**FROM** Shauna Boyce, Superintendent

**ORIGINATOR** Scott Johnston, Associate Superintendent

**RESOURCE** Sheryl Bridgeman, Division Principal, Literacy and Lifelong Learning  
Shaye Patras, Division Principal, Numeracy and Achievement

**GOVERNANCE POLICY** Board Policy 1: Division Foundational Statements  
Board Policy 2: Role of the Board  
Board Policy 12: Role of the Superintendent  
BP 18: Role of the Student

**ADDITIONAL REFERENCE** Administrative Procedure 280 – Off-Site Activities  
*Education Act: 16, 18, 33, 196-197, 222*

**SUBJECT** **WHERE THE WORLD OPENS UP REPORT**

---

### PURPOSE

For information. No recommendation required.

### BACKGROUND

The Board of Trustees upholds the Division’s vision, mission, values and priorities for student education. The attached report is in support of these assurances.

### REPORT SUMMARY

This *Report* provides a summary of student off-site activities that schools provided during the 2021-2022 school year and, as such, this report is titled: *Where the World Opens Up*. Off-site activities in Parkland School Division adhere to *Administrative Procedure 280 – Off-Site Activities*. Division staff ensure that the safe learning environment that exists within the school shall also extend to off-site experiences, and that care shall be taken to ensure that off-site activities are organized to maximize educational benefit and protect the safety and well-being of students.

This Report contains summative information with respect to off-site destinations. Each individual off-site experience creates a rich narrative, and a small sample of experiences is also included.

Administration would be pleased to respond to any questions.

SJ:kz

### Parkland School Division: Where the World Opens (Back) Up

We experienced challenges in the Spring of 2020 that we hoped never to face: a global pandemic brought the necessity of rethinking our whole system of education. The 2020-2022 school years certainly proved to be the most challenging for schools and jurisdictions everywhere. Restrictions continued with respect to access to events and opportunities – our staff responded by continuously seeking out and improving our exploration of the world, and our interactions with others, through digital approaches. We persevered.

We begin the 2022-2023 school year with an optimistic sense that we can, once again, seek out meaningful experiences – both in-school and off-campus.

We embrace a renewed sense of optimism, and look forward to any, and every, opportunity to attend to our Mission:

**We assure supportive learning environments, meaningful experiences and healthy relationships that create opportunities to develop resilience, to gain diversity in perspectives and to achieve enduring success.**

As we journey, continuously, toward our Vision:

**Our students possess the confidence, resilience, insight and skills required to thrive in, and positively impact, the world.**

The impact of off-site-activities – alternative learning approaches – for students may last a lifetime.

Throughout the 2021-2022 school year, our staff explored opportunities for our students to enjoy learning in the greater world, outside of the school walls. We found ways to enjoy our local community.

#### ***The world began to open back up for our students.***

This Parkland School Division Board Report highlights the ways in which our school staff open up learning for our students. This report is largely summative, given the complexity of accurately capturing every outcome and classroom experience for each child.

While the report details the destination of many of our off-site activities, it is important to note that the world certainly begins to open up for our students while still within the walls and grounds of the school. Consider, for instance, the *National Archery in Schools Program*.

Principal Madge-Arkininstall and teacher Mr. Cherry at Millgrove School noted:

*Millgrove "opened up the world" by making archery available for students in Parkland School Division. Archery has been available at Millgrove School for 6 years and the archery team has grown to include over 80 members from grades 4 to 12, and is the largest team currently competing in Alberta.*

*The team has been held in strong regard around the archery community for consistently producing archers who are highly trained and skilled given their young age and number of students that are interested in the program. This is how Millgrove School is opening up the world for their own students and students in their community.*

In-school opportunities exist to connect our students to the world. Planned events occur in our schools to generate cooperative social action. Our students followed, and continue to follow, the unfolding conflict in Ukraine. Assistant Principal Oldham at High Park School shared:

*We re-started our Desktop Garage Sale. All students at High Park make, create, bake, donate items to sell off the tops of their desks. Students then circulated and purchased items of interest for a nominal amount. It was a wonderful way for our "school world" to open up as it was really the first time we had a school wide event with students from across the grades interacting.*

*All of the proceeds also went to an organization supporting Ukrainian Refugees.....supporting others whose worlds were both collapsing, yet opening up at the same time.*

Schools seek out ways to open up the world through unique experiences. Principal Visscher at Blueberry School provided an image capturing how the school brought in parents to make perogies with students in grade three (image to the right).

Principal Bileau at Entwistle School also shared how the World Opens Up inside the school as well:

*Staff and Student Leadership planned an end of the year Carnival for our students and families. Events included games and competitions. Parking was at a premium--a large number of our parents came and brought their little ones to join in the fun.*

At Muir Lake School, representatives for the Edmonton Japanese Cultural Society worked with students in grades seven through nine (image below). The Muir Lake students gained a greater appreciation for Japanese culture and traditions.

Assistant Principal Everitt-Dalinger at Forest Green additionally shared the school's connection to Japanese culture:

*Our Grade 1s and 2s did a walking tour of the Stony Plain murals stopping in Shikaoi Park where they had lunch. During this tour, they explored the community, both past, and present as well as Stony Plain's sister city in Japan. The world truly opened up for our students!*

In 1985, the Town of Stony Plain and Shikaoi Japan joined the Japanese Twinning Program. The intent of the program is to provide Stony Plain and Shikaoi residents with the opportunity to experience international cultures. Parkland School Division students have historically enjoyed the opportunity for student-exchange, and the program will resume in the 2022-2023 school year.

Fundraising opportunities also connect students with cooperative social action. Principal Jensen at Memorial Composite High School shared that the Memorial Bike-A-Thon, on May 19<sup>th</sup>, hosted by the Memorial Interact Student Leadership Group, raised over thirty-one thousand dollars for the Alberta Cancer Foundation.

Parent volunteers enable rich opportunities for learning experiences beyond the traditional classroom. During the Pandemic, our schools were closed off to outside visitors and we maintained student cohorts to minimize the potential for an outbreak. Midway through the year, our athletic programs restarted and our spectators were permitted in.

Our own schools often exist as destinations for students from other schools. Indigenous cultural experiences, drama events, athletic competitions and other celebrations provide an opportunity for our students to interact and experience learning in alternate ways.

Principal Lovsund at Duffield School noted:

*Our Grade 8 culture camp, organized by our Indigenous Liaison and our Division Principal, was a fantastic success. It was scheduled to be at YoWoChAs but we hosted here at Duffield instead. We had a full day of circle sharing, medicine bag making, jewelry making, hide scraping, indigenous teachings, music, dance, and food.*

*It was a great opportunity to bring students together and to learn more about indigenous ways of knowing. The presenters were all fantastic storytellers and the experience was one that we will want to repeat.*

Students from Duffield School presented their experiences from this opportunity at the Regular Board Meeting on June 21, 2022.

Principal Neuman of Stony Plain Central School shared:

*One of our first opportunities for us to come together as a larger school community was in April last year. We held three assemblies with multiple grades for Teepee Teachings with Elder Philip. Junior High students helped assemble the teepee in the gym and all students were captivated by the teepee and teachings.*

Parkland School Division exists on beautiful Treaty Six Territory. Many of our schools enjoy the beautiful wilderness that exists right outside our doors. For instance, during the 2021-2022 school year, there were almost 800 individual student visits to the Chickackoo Recreational Area. Outdoor educational opportunities abound.

Principal Haley of Greystone Centennial Middle School shared:

*One of the memorable trips that we went on last year was our Outdoor Education camping trip. The students had to prepare their materials and learn how to operate in case something happened. This included how to pick a spot for tents and how to put them up correctly. These skills were put to the test as a small, but intense, storm cell passed over the campground at night. It brought howling wind, thunder, and torrential rain.*

*Everyone gained a new appreciation for the "classroom" learning for outdoor education.*

These are only a few examples of activities that open up the world for our students, in and around our schools. Throughout 2021-2022 we experienced the return of parents and volunteers to our schools, and the opportunity for engagement-activities that provided unique ways to expand our students' learning.

In total, more than 20,000 unique student experiences occurred as off-site activities. A summative list of destinations, by grade and student count, follows. As we think back on our own experiences in school, on field trips and through activities, we remember the fun, we cherish the relationships, and we appreciate the learning that occurs when our world is opened up.

**Looking Forward:** In addition to the variety of off-site activities that schools are considering, both Memorial Composite High School and Spruce Grove Composite High School are currently planning international trips for the 2022-2023 school year. These exciting opportunities are in the initial stages of planning and so they are not detailed in this report.

## Parkland School Division: Where the World Opens Up – Summative Off-site Information

Hyperlinks are provided for more information on the destinations of our off-site experiences.

<b>Academy Fabricators</b>	Grade 10	1 school on 1 visit. 22 students.
Fabrication	<a href="https://www.academyfabricators.ca/">https://www.academyfabricators.ca/</a>

Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June

**For more information:**

Parkland School Division’s [Off-Site Activities Procedure](#) (280) provides the guiding operational regulations regarding off-site activity planning and risk mitigation. Notably, that offsite activities shall be safe, shall provide parents with proper information, and that every activity shall be adequately supervised.

Student safety remains the first consideration in planning, preparing and engaging in any off-site activity.
