SUBJECT 2024-2025 FALL FORECAST

#### **PURPOSE**

For information. No recommendation required.

#### **BACKGROUND**

The Division prepares a fall forecast based on the September enrolments each year. The Division updates revenue projections, staffing and other expenses based on these actual enrolments to provide sites with an updated operating plan based on their revised allocations.

### **REPORT SUMMARY**

The October forecast included within this package is an updated forecast for the year ending August 31, 2025. This report provides variance explanations for the changes from the approved budget for 2024-2025.

The forecasted revenues are \$159.7M, an increase of 1.1% from the budget. The forecasted expenditures are \$159.1M an increase of 0.6% from the budget. The increases in revenues and expenses are due to adjusting the revenues due to grant rate increases offset by decrease in WMA enrolments from budget. Schools and departments adjusted expenditures to align with the updated revenue projections.

The Division is forecasting a surplus of \$602K compared to a deficit of \$250K in the budget. The change in the surplus/deficit is related to a surplus in maintenance to offset the program's negative operating reserve, \$500K of the additional revenue is allotted to replenish the capital reserve offset by an increase in ARO amortization.

Administration would be pleased to respond to any questions.

## 2024-2025 Fall Forecast

The Fall Forecast provides an update to the 2024-2025 budget that was approved in the spring. This forecast incorporates changes in revenues based on actual enrolments and other changes since the budget was approved. Expenditures have also been updated to include changes in staffing, and expenditures based on the updated revenue. The surplus forecasted is \$852K higher than budget due to the maintenance program running a surplus to offset the deficit in their operating reserve and a \$500K surplus to be transferred to replenish the capital reserves offset by increase in ARO amortization expense.

School enrolments at September 27, 2024 were down 81 students or 0.6% from the 2024-2025 budget. School allocations have been updated in the fall forecast based on their actual September 27 enrolments and Division weighted moving average (WMA) revenues were updated to reflect these enrolments. WMA revenues are calculated using the WMA enrolment. WMA enrolment is a weighted moving average calculated using three years of data. The WMA enrolment for 2024-2025 is calculated using 20% of 2022-2023 enrolments, 30% of 2023-2024 enrolments and 50% of 2024-2025 enrolments. Therefore, as enrolment increases funding lags behind as new growth is only funded in 50% the first year and 80% in the second year. The Division has updated its estimates and will receive the final calculations from Alberta Education in the spring.

Sites have updated their forecasts to reflect changes in their allocations based on their actual enrolments, staffing changes and new information.

The Division's fall forecast is projecting a surplus of \$602K for the year. The Division's operating reserve cap before school generated funds (SGF) is \$9.2M (6% of the 2023-2024 expenditures). The Division is forecast to be below the reserve cap and have an operating reserve before SGF of \$5.4M at the end of the year.
